Full stack software engineer

9 years of experience

Experienced Full-Stack Software Engineer with 9 years of hands-on experience developing scalable web and backend systems using Java, Spring Boot, Angular, and AWS. Strong background in designing RESTful APIs, modern frontend architecture, and cloud-native applications. Known for self-driven learning, cross-functional collaboration, and high-quality code delivery. Passionate about robotics, AI tools, and solving complex technical problems

- SKILLS
- *Backend:* Python, FastApi, Java, Spring Boot, Hibernate, Junit, RabbitMQ, Grafana, Swagger
 - *Frontend:* Angular 20, JavaScript, TypeScript, RxJs, NgRx, PrimeNG, SyncFusion
 - *Used Technologies:* Amazon AWS, CDN CloudFront, S3, Lambda, EC2
 - *Databases:* MySQL, MongoDB, Couchbase, OrientDb, Solar
 - *AI tools:* cursor, antigravity, gemini cli, grock, chat gpt, custom ai models

01/21 – NOW

TA 9 (Tel Aviv, Israel), Full stack software engineer

5 year

- Development application for Intelligence service, which allow connect to any user database and help in investigation actions.
- Design and implementation of Authentication and Authorization services, SSO
- Responsible for implementation REST API logic and architecture of application, development of new features of application, migration legacy code from **Jersey JAX-RS** to **Spring Boot** at frontend migration **AngularJS** to **Angular 20**, implemented http and ws services for client-server communication
- Used in work **Python, FastAPI, Grafana, Java, Spring Boot, RabbitMQ, Swagger** and databases **MySQL, OrientDb, Solar**

09/18 – 01/21

Dialogic (Petach Tikva, Israel), Full stack software engineer

1.5 year

- Development admin part for communication equipment of VoIP such as Session Border Controllers and Control Switches.
- Was responsible for implementation new features and supporting existed code
- Back-end based on **Java, Spring Boot, Couchbase**
- Development user interface based on web client using **Angular 8, PrimeNG**

10/17 – 09/18

DellEMC(Beersheba, Israel), Backend Developer

1 year

- Java based back-end application development in project "Comilion" using **Spring Boot, MongoDB, Splunk, RabbitMQ**
- Integrating between "Comilion" – A decentralized collaborative security ecosystem and other data collection and collaboration systems using REST API
- Adding software tracing capabilities using Spring Sleuth and Zipkin

09/15 – 07/17

Tel-ran ltd (Rehovot, Israel), Backend Developer

2 year

- Java server side development for a software solution which helps people collect the documents they need in order to immigrate to a different country

EDUCATION

2011-2012: Computer academy, programming courses - Professional training for Java

2005-2011: The Kiev National Economy University - International Economy and Business

LANGUAGES

English ,Hebrew, Ukranian, Russian
